Skills

SQL • Power BI • Data Warehousing • Python • ETL Testing • Tableau • Agile Testing/ Functional Testing/ Regression Testing • CI/CD Tools/ Bitbucket/ GIT/ Basic of Selenium • Gap Analysis • RiskManagment • Agile Project Management • Data Analysis • Requirement Gathering • Process Management • Stakeholder Analysis • Decision Making • Problem Solving

Summary

Dedicated and results-driven IT Analyst with over 4 years of experience, actively seeking Business Analyst opportunities. Proven expertise in analyzing and optimizing IT systems to meet business objectives, leading to a 20% increase in operational efficiency. Adept at translating complex technical requirements into actionable insights and strategic recommendations. Strong problem-solving skills with a track record of successfully collaborating with cross-functional teams to drive process improvements, resulting in a 15% reduction in project delivery times. Committed to leveraging analytical skills and IT knowledge to excel in a Business Analyst role and drive organizational success.

Experience

Tata Consultancy Services

Nordea Bank - Stockholm

Analyst

08/2019 - 12/2022

- Designed and developed high-level test scenarios and detailed test cases based on the technical design specifications provided by the business, ensuring comprehensive coverage and reducing critical bugs by 25%.
- Developed ETL automation scripts and complex SQL queries to extract, transform, and load financial data; ensured data integrity and eliminated duplicates, resulting in 40% reduction in data validation time.
- Crafted and implemented a detailed test plan outlining scope and objectives, led team coordination and test design, achieving a 50% improvement in test coverage and a 30% decrease in testing time.
- Analyzed and optimized test data through rigorous profiling in alignment with business requirements, resulting in a 35% reduction in data quality issues and a 25% decrease in overall risk in the test environment.
- Conducted comprehensive UI and ETL testing, logging, tracking, and managing identified issues using JIRA, ALM, and qTest; optimized processes and reduced issue resolution time by 25%, enhancing overall project efficiency.
