Dear Hiring Manager,

I am writing to express my interest in the Test Automation Engineer position as advertised. With over five years of experience in quality assurance, particularly in the financial services sector, I am excited about the opportunity to contribute to your team and help ensure the highest standards of quality in your products and services.

In my previous role at Tata Consultancy Services, where I worked with Nordea Bank, I designed and developed high-level test scenarios and detailed test cases based on technical design specifications. This meticulous approach ensured comprehensive coverage and reduced critical bugs by 25%. Additionally, I developed Automation scripts and Automation framework using Selenium WebDriver, Cucumber, TestNG and enhanced complex SQL queries to manage financial data, resulting in a 40% reduction in data validation time and a significant improvement in data integrity.

My experience also includes crafting and implementing detailed test plans, coordinating team efforts, and enhancing test coverage by 50%. Through rigorous profiling and optimization of test data, I reduced data quality issues by 35% and overall risk in the test environment by 25%. My hands-on experience with tools such as JIRA, ALM, and qTest has enabled me to effectively log, track, and manage issues, ultimately reducing issue resolution time by 25% and enhancing overall project efficiency.

My contributions also extended to integrating automated test suite into CI/CD pipelines using Jenkins and Docker, enabling continuous testing and faster releases.

Key highlights of my qualifications include:

- Expert in designing high-level test scenarios and detailed test cases, ensuring comprehensive test coverage and bug reduction.
 - Designing and maintaining a Selenium based automation framework that reduced regression testing by 30%.
 - Proficient in developing ETL automation scripts and complex SQL queries for financial data management, ensuring data integrity and reducing validation time.
 - Developed the CI/CD integration of automated tests using Jenkins, allowing the team to run test automatically with each build, leading to faster feedback loops and smoother deployments.
 - Skilled in crafting detailed test plans, leading to improved test coverage and reduced testing time. Data Quality Optimization: Proven ability to analyse and optimize test data, reducing data quality issues and overall risk.
 - Experienced in using JIRA, TestRail, and QTest for effective issue tracking and resolution, enhancing project efficiency.
- I am particularly drawn due to your commitment to innovation and excellence. I am confident that my background and skills align well with the goals of your Software Development Team. I am enthusiastic about the prospect of bringing my expertise to your company and contributing to the delivery of high-quality products and services.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and skills can contribute to the success of your team. I am available at your earliest convenience for an interview and can be reached at +46 734824347 or via email at choureyneharika@gmail.com.

Sincerely,
Neharika Chourey
