Stockholm, Sweden

Dear Hiring Manager,

I am writing to express my interest in the Analyst position as advertised. With over four years of experience in Business Data Analyst, particularly in the financial services sector, I am excited about the opportunity to contribute to your team and help ensure the highest standards of quality in your products and services.

In my current role at Tata Consultancy Services, I have honed my skills in structuring and driving analysis from initiation to delivery, collaborating closely with management and stakeholders to ensure alignment with business and regulatory requirements. My experience in gathering and analysing business requirements has led to a 15% reduction in development time and a 10% increase in client satisfaction. Additionally, I have facilitated productive discussions that resulted in a 20% decrease in change requests during project implementation.

My work with Nordea Bank in Stockholm has given me a deep understanding of credit risk models and regulatory requirements. I have developed and maintained reporting tools and applications to support both strategic and tactical needs, including dashboards for daily, weekly, and monthly reporting. Through agile methodology adoption, I increased sprint efficiency by 40% and reduced project delivery times by 25%, boosting overall productivity by 15%.

Key highlights of my qualifications include:

● Agile Project Management: Successfully facilitated agile adoption across cross-functional teams, enhancing sprint efficiency and project delivery timelines.

● Stakeholder Collaboration: Proven ability to manage stakeholder relationships and achieve consensus on project scope, reducing change requests and enhancing project outcomes.

● Expertise in Credit Risk Management: Developed a profound understanding of Nordea's credit risk agenda, focusing on High Risk and Credit Risk models, and ensuring compliance with regulatory requirements.

● Technical Proficiency: Proficient in SQL, Power BI, Python, ETL Testing, Java and Tableau, with a solid foundation in data analysis and requirement gathering.

● Having a solid understanding of the cloud technologies AWS, Google Cloud(Big Query), and Microsoft Azure.

● Data Quality Optimization: Proven ability to analyse and optimize test data, reducing data quality issues and overall risk.

I am particularly drawn due to your commitment to innovation and excellence. I am confident that my background and skills align well with the goals of your Software Development Team. I am enthusiastic about the prospect of bringing my expertise to your company and contributing to the delivery of high-quality products and services.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and skills can contribute to the success of your team. I am available at your earliest convenience for an interview and can be reached at +46 734824347 or via email at choureyneharika@gmail.com.

Sincerely,
Neharika Chourey
